

Health and Safety Management System Development

Overview

Posener HS&E Group has highly competent, qualified consultants that are readily available to develop comprehensive health and safety management systems.

These services can include some or all of the following:

- Carrying out an initial health check – a GAP analysis (typically 2 days duration) to understand how able you and your organisation are in understanding and meeting your Statutory duties, and to identify any weaknesses that might be present
- Using the output from the above to develop a comprehensive health, safety and environmental policy document that can provide a value-added contribution to your business
- To including producing a fully compliant health and safety policy statement
- Producing a comprehensive and fully up-to-date health, safety and environmental legislation register
- Producing comprehensive health, safety and environmental risk assessments and method statements (RAMS)
- Providing training on how to evaluate staff compliance and contractor HS&E compliance
- Providing a wide range of health, safety and environmental training workshops
- Providing UKATA verified asbestos awareness training

In addition to the above, we can provide on-going health, safety and environmental management system support to ensure that your documented health, safety and environmental continues to remain fully up-to-date, which would typically include the following:

- Reviewing and updating (as necessary) your health, safety and environmental policy document
- Reviewing and updating (so far as is necessary) your health, safety and environmental legislation register
- Carrying out periodic office and site health, safety and environmental audits and inspections
- Providing additional health, safety and environmental training services to meet your needs and expectations
