

## **Noise the workplace training workshop**

### **Overview**

It is not uncommon for many organisations to encounter situations where work includes using various noisy plant and equipment, or working in environments where noisy works are being carried out.

This course is aimed at providing a straight forward overview of Regulations associated with noise in the workplace, how to carry out effective noise risk assessments and implement effective management control measures to minimize the effect of exposure to excessive levels of noise in the workplace.

### **Course duration**

The training workshop is of half a day duration (3.5 hours).

Depending on client preferences, the course will start at either 09.30am (09.00 registration) or 1.30pm (1.00pm registration) and finish at 1.00pm or 5.00 pm respectively.

### **What will the training workshop cover?**

The training workshop will cover the following key attributes and control measures:

- The Noise at Work Regulations – an overview of the Regulations and how to apply them
- The difference between noise in the workplace and environmental noise pollution
- The control of noise in relation to work activities, - what does this actually mean?
- Risk assessment process in association with work activities where noise is a natural part of the process
- Carrying out noise risk assessments in the workplace
- Carrying out environmental noise risk assessments and surveys
- Information and mandatory safety signage
- PPE requirements in association with noisy work activities – selecting the correct equipment to provide maximum protection

### **Certification**

All candidates will be required to complete a simple, straightforward written examination to verify that they have fully understood the scope and content of this training workshop.

On completion of the training workshop, all successful candidates will receive a certification of attendance.
