

Waste management and control training workshop

Overview

Within the vast majority of commercial and industrial sectors, the production of commercial and industrial waste is inevitable.

Whether your organisation acts in a major role, e.g. as a Principal Contractor within the construction industry or, as a smaller business entity, there are a number of environmental Statutes, Regulations and Local Authority requirements to which your organization will have a duty to comply.

Course duration

The training workshop is of half a day duration (3.5 hours).

Depending on client preferences, the course will start at either 09.30am (09.00 registration) or 1.30pm (1.00pm registration) and finish at 1.00pm or 5.00 pm respectively.

What will the training workshop cover?

The training workshop will cover the following key attributes and control measures:

- An overview of key environmental legislation that is associated with waste management and pollution control
- Understanding the difference between non-hazardous and hazardous waste
- Understanding how to deal with and temporarily store non-hazardous waste and hazardous waste
- Understanding best practice in managing and removing your waste
- An overview of how to manage all documentation associated with the removal of your waste

Certification

All candidates will be required to complete a simple, straightforward written examination to verify that they have fully understood the scope and content of this training workshop.

On completion of the training workshop, all successful candidates will receive a certification of attendance.
